1.2 About the project

AirB&V offers an application dedicated to the supply of caravans to individuals and holidaymakers (holiday rentals) through which hosts can advertise and contract the rental of their caravans with their guests.

You can see our website on: <https://bspqe20-21.github.io/BSPQ21-E1/>

1.3 Pre-requisites

- Java JDK (≥ 12)
- MySQL
- MySQL Workbench
- Maven

-> Also the following libraries should be added to pom.xml file for the project to work: Jetty, JUnit, OpenCSV, MySQL, Datanucleus, Log4J, Jersey, Jacoco, ContiPerf, DOxygen.

1.4 Building and running the project

These are the steps that must be followed in order to successfully build and run the project:

cmd's must be opened in the directory where pom.xml is located.

1. Compile the project:

```
mvn clean compile
```

2. Execute .sql script in MySQL WorkBench: Click on the thunder icon and refresh tables.

3. Create SQL schema:

```
mvn datanucleus:schema-create
```

4. Run Web Server:

```
mvn jetty:run
```

Open another cmd window to run client side

1. Run Client App:

```
mvn exec:java -Pclient
```

1.5 Generating reports

1. Generate doxygen reports (It is needed to be compiled first):

```
mvn doxygen:report
```

2. Create the PDF (if anything is asked, just press enter):

```
cd target/doxygen/latex
make
```

3. Validate:

```
mvn validate
```

Chapter 2

Namespace Index

2.1 Packages

Here are the packages with brief descriptions (if available):

[client.main](#)

This is the documentation for the Java package [client.main](#) intended to work as a wrapper for the Domain Object Model (DOM) of the EasyFilmin Project. This package is composed by 2 classes, EasyFilmin and EasyFilminAdmin. The purpose of this classes is to run the User interface or the Admin interface

Admin interface	11
es.deusto.bspq21e1.client.controller	11
es.deusto.bspq21e1.client.gui	11
es.deusto.bspq21e1.client.main	12
es.deusto.bspq21e1.serialization	12
es.deusto.bspq21e1.server	12
es.deusto.bspq21e1.server.dao	13
es.deusto.bspq21e1.server.data	13
es.deusto.bspq21e1.server.dto	13
es.deusto.bspq21e1.server.remote	13

Chapter 3

Hierarchical Index

3.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

es.deusto.bspq21e1.server.remote.AirBV	15
es.deusto.bspq21e1.client.main.AirBVClient	21
es.deusto.bspq21e1.server.AirBVService	22
es.deusto.bspq21e1.server.AirBVServiceTest	26
es.deusto.bspq21e1.server.remote.AirBVTest	27
es.deusto.bspq21e1.server.dto.Assembler	29
es.deusto.bspq21e1.server.dto.AssemblerTest	31
es.deusto.bspq21e1.client.gui.CancelReservationWindowTest	36
es.deusto.bspq21e1.client.gui.CharacteristicsWindowTest	42
es.deusto.bspq21e1.client.controller.Controller	43
es.deusto.bspq21e1.client.controller.ControllerTest	47
es.deusto.bspq21e1.server.dao.DBManager	49
es.deusto.bspq21e1.server.dao.DBManagerTest	54
es.deusto.bspq21e1.client.gui.InitialWindowTest	60
es.deusto.bspq21e1.client.gui.LogInWindowTest	64

7.1.1 Detailed Description

This is the remote façade pattern class. This class will be in contact with the client side of the application. Managing all of the GET and POST requests, and making use of the ApplicationService pattern.

{@Path} in the class definition is used to define the HTTP path, as well as all of the {@Path} seen bellow in the corresponding methods.

Author

Group 3

Definition at line 39 of file AirBV.java.

7.1.2 Constructor & Destructor Documentation

7.1.2.1 AirBV()

```
es.deusto.bspq21e1.server.remote.AirBV.AirBV ( )
```

Empty constructor for the class.

Definition at line 65 of file AirBV.java.

7.1.3 Member Function Documentation

7.1.3.1 cancelReservation()

```
Response es.deusto.bspq21e1.server.remote.AirBV.cancelReservation (
    @PathParam("code") String code )
```

Gets the code of the reservation client wants to delete and sends it to the Application Service for that.

Parameters

<i>code</i>	Code of the reservation client wants to erase.
-------------	--

Returns

Response depending on the result of the execution.

Definition at line 142 of file AirBV.java.

7.1.3.2 deleteUser()

```
Response es.deusto.bspq21e1.server.remote.AirBV.deleteUser (
    @PathParam("dni") String dni )
```

Gets the ID number from the user the client wants to delete and sends it to the Application Service for that.

Parameters

<i>dni</i>	ID number of the user client wants to delete.
------------	---

Returns

Response depending on the result of the execution.

Definition at line 89 of file AirBV.java.

7.1.3.3 deleteVan()

```
Response es.deusto.bspq21e1.server.remote.AirBV.deleteVan (
    @PathParam("licensePlate") String licensePlate )
```

Gets the license plate of the van client wants to erase and sends it to the Application Service for that.

Parameters

<i>licensePlate</i>	License plate of the van client wants to delete.
---------------------	--

Returns

Response depending on the result of the execution.

Definition at line 127 of file AirBV.java.

7.1.3.4 getUserReservations()

```
ArrayList<ReservationData> es.deusto.bspq21e1.server.remote.AirBV.getUserReservations (
    @PathParam("dni") String dni )
```

Gets the ID number of a user to get all their reservations using the Application Service.

Parameters

<i>dni</i>	ID number of the user.
------------	------------------------

Returns

List of reservations of the user.

Definition at line 216 of file AirBV.java.

7.1.3.5 getUserVans()

```
ArrayList<VanData> es.deusto.bspq21e1.server.remote.AirBV.getUserVans (
    @PathParam("dni") String dni )
```

Gets the ID number of a user to get all their vans using the Application Service.

Parameters

<i>dni</i>	ID number of the user.
------------	------------------------

Returns

List of vans of the user.

Definition at line 234 of file AirBV.java.

7.1.3.6 login()

```
Response es.deusto.bspq21e1.server.remote.AirBV.login (
    @PathParam("email") String email,
    @PathParam("password") String password )
```

Gets the email and password of a user and checks if they are good credentials sending them to the Application Service.

Parameters

<i>email</i>	Email of the user.
<i>password</i>	Password of the user.

Returns

Response depending on the result of the execution.

Definition at line 198 of file AirBV.java.

7.1.3.7 registerReservation()

```
Response es.deusto.bspq21e1.server.remote.AirBV.registerReservation (
    ReservationData rD )
```

Gets the data of a new reservation client wants to register and sends it to the Application Service for that.

Parameters

<i>rD</i>	Gets the data of a new reservation client wants to register.
-----------	--

Returns

Response depending on the result of the execution.

Definition at line 157 of file AirBV.java.

7.1.3.8 registerReservationsList()

```
Response es.deusto.bspq21e1.server.remote.AirBV.registerReservationsList (
    ArrayList< ReservationData > reservationsData )
```

Gets the data from a list of reservations to register them in the system using the Application Service.

Parameters

<i>reservationsData</i>	List of data from the reservations.
-------------------------	-------------------------------------

Returns

Response depending on the result of the execution.

Definition at line 296 of file AirBV.java.

7.1.3.9 registerUser()

```
Response es.deusto.bspq21e1.server.remote.AirBV.registerUser (
    UserData userData )
```

Gets the data from the user from the client, transforms it into a User and sends it to the Application Service to register it.

Parameters

<i>userData</i>	Data from the new user.
-----------------	-------------------------

Returns

Response depending on the result of the execution.

Definition at line 74 of file AirBV.java.

7.1.3.10 registerUsersList()

```
Response es.deusto.bspq21e1.server.remote.AirBV.registerUsersList (
    ArrayList< UserData > usersData )
```

Gets the data from a list of users to register them in the system using the Application Service.

Parameters

<i>usersData</i>	List of data from the users.
------------------	------------------------------

Returns

Response depending on the result of the execution.

Definition at line 251 of file AirBV.java.

7.1.3.11 registerVan()

```
Response es.deusto.bspq21e1.server.remote.AirBV.registerVan (
    VanData vanData,
    @PathParam("kitchen") boolean kitchen,
    @PathParam("shower") boolean shower )
```

Transforms VanData into Van and uses a method from the Application Service to store a Van.

Parameters

<i>vanData</i>	Data of the van client wants to register.
----------------	---

Returns

Response depending on the result of the execution.

Definition at line 102 of file AirBV.java.

7.1.3.12 registerVansList()

```
Response es.deusto.bspq21e1.server.remote.AirBV.registerVansList (
    ArrayList< VanData > vansData )
```

Gets the data from a list of vans to register them in the system using the Application Service.

Parameters

<i>vansData</i>	List of data from the vans.
-----------------	-----------------------------

Returns

Response depending on the result of the execution.

Definition at line 273 of file AirBV.java.

7.1.3.13 searchVans()

```
ArrayList<VanData> es.deusto.bspq21e1.server.remote.AirBV.searchVans (
    @PathParam("location") String location,
    @PathParam("pickUpDate") String pickUpDate,
    @PathParam("returnDate") String returnDate )
```

Gets the location and dates which client has put as parameters and sends it to the Application Service to return the vans that meet those requirements.

Parameters

<i>location</i>	Location of the van.
<i>pickUpDate</i>	Date of pickup of the van.
<i>returnDate</i>	Date of return of the van.

Returns

List of vans which meet the requirements.

Definition at line 180 of file AirBV.java.

7.3.1 Detailed Description

Application service class.

Definition at line 22 of file AirBVService.java.

7.3.2 Constructor & Destructor Documentation

7.3.2.1 AirBVService()

```
es.deusto.bspq21e1.server.AirBVService.AirBVService ( )
```

Definition at line 30 of file AirBVService.java.

7.3.3 Member Function Documentation

7.3.3.1 cancelReservation()

```
boolean es.deusto.bspq21e1.server.AirBVService.cancelReservation (
    String code )
```

Definition at line 57 of file AirBVService.java.

7.3.3.2 deleteUser()

```
boolean es.deusto.bspq21e1.server.AirBVService.deleteUser (
    String dni )
```

Definition at line 126 of file AirBVService.java.

7.3.3.3 deleteVan()

```
boolean es.deusto.bspq21e1.server.AirBVService.deleteVan (
    String licensePlate )
```

Definition at line 134 of file AirBVService.java.

7.3.3.4 getUserReservations()

```
ArrayList<Reservation> es.deusto.bspq21e1.server.AirBVService.getUserReservations (
    String dni )
```

Definition at line 115 of file AirBVService.java.

7.3.3.5 getUserVans()

```
ArrayList<Van> es.deusto.bspq21e1.server.AirBVService.getUserVans (
    String dni )
```

Definition at line 120 of file AirBVService.java.

7.3.3.6 login()

```
User es.deusto.bspq21e1.server.AirBVService.login (
    String email,
    String password )
```

Definition at line 109 of file AirBVService.java.

7.3.3.7 registerReservation()

```
boolean es.deusto.bspq21e1.server.AirBVService.registerReservation (
    Date bookingDate,
    int duration,
    String van,
    String vanRenter )
```

Definition at line 62 of file AirBVService.java.

7.3.3.8 registerReservationsList()

```
boolean es.deusto.bspq21e1.server.AirBVService.registerReservationsList (
    ArrayList< Reservation > reservations )
```

Definition at line 167 of file AirBVService.java.

7.3.3.9 registerUser()

```
boolean es.deusto.bspq21e1.server.AirBVService.registerUser (
    String dni,
    String name,
    String email,
    String password )
```

Registers a new user in Database and stores it in the map

Parameters

<i>dni</i>	- new user's dni
<i>name</i>	- new users' name
<i>email</i>	- new user's email
<i>password</i>	- new user's password

Returns

returns the created new User

Definition at line 42 of file AirBVService.java.

7.3.3.10 registerUsersList()

```
boolean es.deusto.bspq21e1.server.AirBVService.registerUsersList (
    ArrayList< User > users )
```

Definition at line 142 of file AirBVService.java.

7.3.3.11 registerVan()

```
boolean es.deusto.bspq21e1.server.AirBVService.registerVan (
    Van van )
```

Definition at line 49 of file AirBVService.java.

7.3.3.12 registerVansList()

```
boolean es.deusto.bspq21e1.server.AirBVService.registerVansList (
    ArrayList< Van > vans )
```

Definition at line 157 of file AirBVService.java.

7.3.3.13 searchVans()

```
ArrayList<Van> es.deusto.bspq21e1.server.AirBVService.searchVans (
    String location,
    String pickUpDateString,
    String returnDateString )
```

Definition at line 72 of file AirBVService.java.

7.3.3.14 searchVansByLocation()

```
ArrayList<Van> es.deusto.bspq21e1.server.AirBVService.searchVansByLocation (
    String location )
```

Definition at line 98 of file AirBVService.java.

The documentation for this class was generated from the following file:

7.8.1 Detailed Description

Window class for the visualization of the logic behind cancellations of vans by a user.

Author

BSPQ21-E1

Version

1.0

Definition at line 35 of file CancelReservationWindow.java.

7.8.2 Constructor & Destructor Documentation

7.8.2.1 CancelReservationWindow()

```
es.deusto.bspq21e1.client.gui.CancelReservationWindow.CancelReservationWindow (
    Controller controller,
    UserData userData,
    JFrame frmMain,
    boolean visible )
```

Creates the window for a specific user.

Parameters

<i>controller</i>	Controller used for handling all requests in the system.
<i>userData</i>	The user that has logged in.

Definition at line 59 of file CancelReservationWindow.java.

7.8.3 Member Function Documentation

7.8.3.1 getBtnBack()

```
JButton es.deusto.bspq21e1.client.gui.CancelReservationWindow.getBtnBack ( )
```

Definition at line 199 of file CancelReservationWindow.java.

7.8.3.2 getBtnCancel()

```
JButton es.deusto.bspq21e1.client.gui.CancelReservationWindow.getBtnCancel ( )
```

Definition at line 195 of file CancelReservationWindow.java.

7.8.3.3 getFrmCancelReservation()

```
JFrame es.deusto.bspq21e1.client.gui.CancelReservationWindow.getFrmCancelReservation ( )
```

Definition at line 191 of file CancelReservationWindow.java.

7.8.3.4 getJlReservationsList1()

```
JList<String> es.deusto.bspq21e1.client.gui.CancelReservationWindow.getJlReservationsList1 ( )
```

Definition at line 207 of file CancelReservationWindow.java.

7.8.3.5 getJtReservationsTable()

```
JTable es.deusto.bspq21e1.client.gui.CancelReservationWindow.getJtReservationsTable ( )
```

Definition at line 211 of file CancelReservationWindow.java.

7.8.3.6 getLblTitle()

```
JLabel es.deusto.bspq21e1.client.gui.CancelReservationWindow.getLblTitle ( )
```

Definition at line 227 of file CancelReservationWindow.java.

7.8.3.7 getReservations()

```
ArrayList<ReservationData> es.deusto.bspq21e1.client.gui.CancelReservationWindow.getReservations  
( )
```

Definition at line 215 of file CancelReservationWindow.java.

7.8.3.8 getReservationsList()

```
javax.swing.DefaultListModel<String> es.deusto.bspq21e1.client.gui.CancelReservationWindow.  
getReservationsList ( )
```

Definition at line 219 of file CancelReservationWindow.java.

7.8.3.9 getScrollReservations()

```
JScrollPane es.deusto.bspq21e1.client.gui.CancelReservationWindow.getScrollReservations ( )
```

Definition at line 203 of file CancelReservationWindow.java.

7.8.3.10 getTableModel()

`DefaultTableModel es.deusto.bspq21e1.client.gui.CancelReservationWindow.getTableModel ()`

Definition at line 223 of file `CancelReservationWindow.java`.

The documentation for this class was generated from the following file:

- `src/main/java/es/deusto/bspq21e1/client/gui/CancelReservationWindow.java`

7.12.1 Detailed Description

Definition at line 29 of file Controller.java.

7.12.2 Constructor & Destructor Documentation

7.12.2.1 Controller()

```
es.deusto.bspq21e1.client.controller.Controller.Controller (
    String hostname,
    String port,
    String demoDataPath )
```

Definition at line 39 of file Controller.java.

7.12.3 Member Function Documentation

7.12.3.1 cancelReservation()

```
boolean es.deusto.bspq21e1.client.controller.Controller.cancelReservation (
    String code )
```

Definition at line 92 of file Controller.java.

7.12.3.2 eraseUser()

```
boolean es.deusto.bspq21e1.client.controller.Controller.eraseUser (
    String dni )
```

Definition at line 64 of file Controller.java.

7.12.3.3 eraseVan()

```
boolean es.deusto.bspq21e1.client.controller.Controller.eraseVan (
    String licensePlate )
```

Definition at line 78 of file Controller.java.

7.12.3.4 getDemoDataPath()

```
String es.deusto.bspq21e1.client.controller.Controller.getDemoDataPath ( )
```

Definition at line 362 of file Controller.java.

7.12.3.5 getMyReservations()

```
ArrayList<ReservationData> es.deusto.bspq21e1.client.controller.Controller.getMyReservations (
    UserData user )
```

Definition at line 185 of file Controller.java.

7.12.3.6 getMyVans()

```
ArrayList<VanData> es.deusto.bspq21e1.client.controller.Controller.getMyVans (
    String dni )
```

Definition at line 204 of file Controller.java.

7.12.3.7 getResourcebundle()

```
ResourceBundle es.deusto.bspq21e1.client.controller.Controller.getResourcebundle ( )
```

Returns the ResourceBundle

Returns

ResourceBundle

Definition at line 343 of file Controller.java.

7.12.3.8 initializeDemoData()

```
void es.deusto.bspq21e1.client.controller.Controller.initializeDemoData ( )
```

Reads the csv with the demo data and creates the different lists for dividing users, vans and reservations. Then, it calls three different methods for storing those objects in the system DB.

Definition at line 273 of file Controller.java.

7.12.3.9 loginUser()

```
UserData es.deusto.bspq21e1.client.controller.Controller.loginUser (
    String email,
    String password )
```

Definition at line 127 of file Controller.java.

7.12.3.10 registerReservation()

```
boolean es.deusto.bspq21e1.client.controller.Controller.registerReservation (
    Date bookingDate,
    int duration,
    VanData vanData,
    UserData vanRenter )
```

Definition at line 165 of file Controller.java.

7.12.3.11 registerReservationsList()

```
boolean es.deusto.bspq21e1.client.controller.Controller.registerReservationsList (
    ArrayList< ReservationData > reservations )
```

Definition at line 254 of file Controller.java.

7.12.3.12 registerUsers()

```
boolean es.deusto.bspq21e1.client.controller.Controller.registerUsers (
    String dni,
    String name,
    String email,
    String password )
```

Definition at line 107 of file Controller.java.

7.12.3.13 registerUsersList()

```
boolean es.deusto.bspq21e1.client.controller.Controller.registerUsersList (
    ArrayList< UserData > users )
```

Definition at line 222 of file Controller.java.

7.12.3.14 registerVan()

```
boolean es.deusto.bspq21e1.client.controller.Controller.registerVan (
    VanData vanData )
```

Definition at line 145 of file Controller.java.

7.12.3.15 registerVansList()

```
boolean es.deusto.bspq21e1.client.controller.Controller.registerVansList (
    ArrayList< VanData > vans )
```

Definition at line 237 of file Controller.java.

7.12.3.16 searchVans()

```
ArrayList<VanData> es.deusto.bspq21e1.client.controller.Controller.searchVans (
    String location,
    String pickUpDate,
    String returnDate )
```

Definition at line 46 of file Controller.java.

7.12.3.17 setLocale()

```
void es.deusto.bspq21e1.client.controller.Controller.setLocale (
    String locale )
```

Sets the currentLocale

Parameters

<i>locale</i>	
---------------	--

Definition at line 351 of file Controller.java.

7.14.1 Detailed Description

Singleton [DBManager](#) class.

Author

Group E1

Version

1.0-SNAPSHOT

Definition at line 27 of file [DBManager.java](#).

7.14.2 Member Function Documentation

7.14.2.1 deleteReservation()

```
boolean es.deusto.bspq21e1.server.dao.DBManager.deleteReservation (
    String reservation )
```

Deletes a reservation from the DB.

Parameters

<i>reservation</i>	
--------------------	--

Definition at line 125 of file [DBManager.java](#).

7.14.2.2 deleteUser()

```
boolean es.deusto.bspq21e1.server.dao.DBManager.deleteUser (
    String dni )
```

Definition at line 159 of file [DBManager.java](#).

7.14.2.3 deleteVan()

```
boolean es.deusto.bspq21e1.server.dao.DBManager.deleteVan (
    String licensePlate )
```

Definition at line 205 of file DBManager.java.

7.14.2.4 getInstance()

```
static DBManager es.deusto.bspq21e1.server.dao.DBManager.getInstance ( ) [static]
```

Method that creates a [DBManager](#) instance if needed and returns it.

Returns

[DBManager](#) instance

Definition at line 41 of file DBManager.java.

7.14.2.5 getReservationsByUser()

```
List<Reservation> es.deusto.bspq21e1.server.dao.DBManager.getReservationsByUser (
    String vanRenter )
```

Method that finds and returns all of the reservations given a user.

Parameters

<i>vanRenter</i>	to retrieve the reservations from
------------------	-----------------------------------

Returns

an ArrayList with all of the user's reservations

Definition at line 337 of file DBManager.java.

7.14.2.6 getReservationsByVan()

```
List<Reservation> es.deusto.bspq21e1.server.dao.DBManager.getReservationsByVan (
    String vanLicensePlate )
```

Definition at line 407 of file DBManager.java.

7.14.2.7 getUser()

```
User es.deusto.bspq21e1.server.dao.DBManager.getUser (
    String dni )
```

Definition at line 267 of file DBManager.java.

7.14.2.8 getVan()

```
Van es.deusto.bspq21e1.server.dao.DBManager.getVan (
    String licensePlate )
```

Definition at line 297 of file DBManager.java.

7.14.2.9 getVansByDates()

```
List<Van> es.deusto.bspq21e1.server.dao.DBManager.getVansByDates (
    String location,
    Date pickUpDate,
    Date returnDate )
```

Definition at line 383 of file DBManager.java.

7.14.2.10 getVansByLocation()

```
List<Van> es.deusto.bspq21e1.server.dao.DBManager.getVansByLocation (
    String location )
```

Definition at line 451 of file DBManager.java.

7.14.2.11 getVansByUser()

```
List<Van> es.deusto.bspq21e1.server.dao.DBManager.getVansByUser (
    String user )
```

Definition at line 498 of file DBManager.java.

7.14.2.12 store() [1/4]

```
boolean es.deusto.bspq21e1.server.dao.DBManager.store (
    Reservation reservation )
```

Stores a reservation in the DB (makes the object persistent).

Parameters

<i>reservation</i>	
--------------------	--

Definition at line 82 of file DBManager.java.

7.14.2.13 store() [2/4]

```
boolean es.deusto.bspq21e1.server.dao.DBManager.store (
    Review review )
```

Stores a review in the DB (makes the object persistent).

Parameters

<i>review</i>	
---------------	--

Definition at line 73 of file DBManager.java.

7.14.2.14 store() [3/4]

```
boolean es.deusto.bspq21e1.server.dao.DBManager.store (
    User user )
```

Stores a user in the DB (makes the object persistent).

Parameters

<i>user</i>	
-------------	--

Definition at line 55 of file DBManager.java.

7.14.2.15 store() [4/4]

```
boolean es.deusto.bspq21e1.server.dao.DBManager.store (
    Van van )
```

Stores a van in the DB (makes the object persistent).

Parameters

<i>van</i>	
------------	--

Definition at line 64 of file DBManager.java.

7.14.2.16 validateLogin()

```
User es.deusto.bspq21e1.server.dao.DBManager.validateLogin (
    String email,
    String password )
```

Method that searches for a user given an email and password.

Parameters

<i>user's</i>	email and password
---------------	--------------------

Returns

user if valid login, null otherwise

Definition at line 549 of file DBManager.java.

The documentation for this class was generated from the following file:

7.16.1 Detailed Description

Window class for the initial point of the program, where users can register or log in.

Author

SPQ Group 1

Version

1.0

Definition at line 27 of file InitialWindow.java.

7.16.2 Constructor & Destructor Documentation

7.16.2.1 InitialWindow()

```
es.deusto.bspq21e1.client.gui.InitialWindow.InitialWindow (
    Controller controller,
    boolean visible )
```

Creates the initial window of the program.

Parameters

<i>controller</i>	Controller used for handling all requests in the system.
-------------------	--

Definition at line 45 of file InitialWindow.java.

7.16.3 Member Function Documentation

7.16.3.1 getBtnExit()

```
JButton es.deusto.bspq21e1.client.gui.InitialWindow.getBtnExit ( )
```

Definition at line 279 of file InitialWindow.java.

7.16.3.2 getBtnLogin()

```
JButton es.deusto.bspq21e1.client.gui.InitialWindow.getBtnLogin ( )
```

Definition at line 275 of file InitialWindow.java.

7.16.3.3 getBtnRegister()

```
JButton es.deusto.bspq21e1.client.gui.InitialWindow.getBtnRegister ( )
```

Definition at line 271 of file InitialWindow.java.

7.16.3.4 getFrmAirbv()

```
JFrame es.deusto.bspq21e1.client.gui.InitialWindow.getFrmAirbv ( )
```

Definition at line 311 of file InitialWindow.java.

7.16.3.5 getLblBasqueButton()

```
JLabel es.deusto.bspq21e1.client.gui.InitialWindow.getLblBasqueButton ( )
```

Definition at line 307 of file InitialWindow.java.

7.16.3.6 getLblBasqueImg()

```
JLabel es.deusto.bspq21e1.client.gui.InitialWindow.getLblBasqueImg ( )
```

Definition at line 295 of file InitialWindow.java.

7.16.3.7 getLblEnglishButton()

```
JLabel es.deusto.bspq21e1.client.gui.InitialWindow.getLblEnglishButton ( )
```

Definition at line 303 of file InitialWindow.java.

7.16.3.8 getLblEnglishImg()

```
JLabel es.deusto.bspq21e1.client.gui.InitialWindow.getLblEnglishImg ( )
```

Definition at line 291 of file InitialWindow.java.

7.16.3.9 getLblHead()

```
JLabel es.deusto.bspq21e1.client.gui.InitialWindow.getLblHead ( )
```

Definition at line 263 of file InitialWindow.java.

7.16.3.10 getLblLogoImg()

```
JLabel es.deusto.bspq21e1.client.gui.InitialWindow.getLblLogoImg ( )
```

Definition at line 283 of file InitialWindow.java.

7.16.3.11 getLblSpanishButton()

```
JLabel es.deusto.bspq21e1.client.gui.InitialWindow.getLblSpanishButton ( )
```

Definition at line 299 of file InitialWindow.java.

7.16.3.12 getLblSpanishImg()

```
JLabel es.deusto.bspq21e1.client.gui.InitialWindow.getLblSpanishImg ( )
```

Definition at line 287 of file InitialWindow.java.

7.16.3.13 getPanel()

```
JPanel es.deusto.bspq21e1.client.gui.InitialWindow.getPanel ( )
```

Definition at line 267 of file InitialWindow.java.

7.31.1 Detailed Description

Class for the representation of the Reservation object which is going to be send to clients.

Author

SPQ Group 1

Version

1.0

Definition at line 10 of file ReservationData.java.

7.31.2 Constructor & Destructor Documentation

7.31.2.1 ReservationData() [1/3]

```
es.deusto.bspq21e1.serialization.ReservationData.ReservationData ( )
```

Definition at line 19 of file ReservationData.java.

7.31.2.2 ReservationData() [2/3]

```
es.deusto.bspq21e1.serialization.ReservationData.ReservationData (
    String code,
    Date bookingDate,
    int duration,
    String van,
    String vanRenter )
```

Creates the object that has the data from Reservation.

Parameters

<i>code</i>	Code of the reservation.
<i>bookingDate</i>	Date of the reservation.
<i>duration</i>	Duration of the reservation in days.
<i>van</i>	Rented van.
<i>vanRenter</i>	Owner of the rented van.

Definition at line 31 of file ReservationData.java.

7.31.2.3 ReservationData() [3/3]

```
es.deusto.bspq21e1.serialization.ReservationData.ReservationData (
    Date bookingDate,
    int duration,
    String van,
    String vanRenter )
```

Creates the object that has the data from Reservation.

Parameters

<i>bookingDate</i>	Date of the reservation.
<i>duration</i>	Duration of the reservation in days.
<i>van</i>	Rented van.
<i>vanRenter</i>	Owner of the rented van.

Definition at line 47 of file ReservationData.java.

7.31.3 Member Function Documentation

7.31.3.1 getBookingDate()

```
Date es.deusto.bspq21e1.serialization.ReservationData.getBookingDate ( )
```

Definition at line 62 of file ReservationData.java.

7.31.3.2 getCode()

```
String es.deusto.bspq21e1.serialization.ReservationData.getCode ( )
```

Definition at line 56 of file ReservationData.java.

7.31.3.3 getDuration()

```
int es.deusto.bspq21e1.serialization.ReservationData.getDuration ( )
```

Definition at line 68 of file ReservationData.java.

7.31.3.4 getVan()

```
String es.deusto.bspq21e1.serialization.ReservationData.getVan ( )
```

Definition at line 74 of file ReservationData.java.

7.31.3.5 getVanRenter()

```
String es.deusto.bspq21e1.serialization.ReservationData.getVanRenter ( )
```

Definition at line 80 of file ReservationData.java.

7.31.3.6 setBookingDate()

```
void es.deusto.bspq21e1.serialization.ReservationData.setBookingDate (
    Date bookingDate )
```

Definition at line 65 of file ReservationData.java.

7.31.3.7 setCode()

```
void es.deusto.bspq21e1.serialization.ReservationData.setCode (
    String code )
```

Definition at line 59 of file ReservationData.java.

7.31.3.8 setDuration()

```
void es.deusto.bspq21e1.serialization.ReservationData.setDuration (
    int duration )
```

Definition at line 71 of file ReservationData.java.

7.31.3.9 setVan()

```
void es.deusto.bspq21e1.serialization.ReservationData.setVan (
    String van )
```

Definition at line 77 of file ReservationData.java.

7.31.3.10 setVanRenter()

```
void es.deusto.bspq21e1.serialization.ReservationData.setVanRenter (
    String vanRenter )
```

Definition at line 83 of file ReservationData.java.

7.31.3.11 toString()

```
String es.deusto.bspq21e1.serialization.ReservationData.toString ( )
```

Definition at line 88 of file ReservationData.java.

7.40.1 Detailed Description

Class for the representation of the User object which is going to be send to clients.

Author

SPQ Group 1

Version

1.0

Definition at line 11 of file UserData.java.

7.40.2 Constructor & Destructor Documentation

7.40.2.1 UserData() [1/2]

```
es.deusto.bspq21e1.serialization.UserData.UserData ( )
```

Definition at line 19 of file UserData.java.

7.40.2.2 UserData() [2/2]

```
es.deusto.bspq21e1.serialization.UserData.UserData (
    String dni,
    String name,
    String email,
    String password )
```

Creates the object that has the data from User.

Parameters

<i>dni</i>	DNI of the user.
<i>name</i>	Name of the user.
<i>email</i>	Email of the user.

Definition at line 29 of file UserData.java.

7.40.3 Member Function Documentation

7.40.3.1 getDni()

```
String es.deusto.bspq21e1.serialization.UserData.getDni ( )
```

Definition at line 37 of file UserData.java.

7.40.3.2 getEmail()

```
String es.deusto.bspq21e1.serialization.UserData.getEmail ( )
```

Definition at line 53 of file UserData.java.

7.40.3.3 getName()

```
String es.deusto.bspq21e1.serialization.UserData.getName ( )
```

Definition at line 45 of file UserData.java.

```
void es.deusto.bspq21e1.serialization.UserData.setDni (
    String dni )
```

Definition at line 41 of file UserData.java.

7.40.3.7 setEmail()

```
void es.deusto.bspq21e1.serialization.UserData.setEmail (
    String email )
```

Definition at line 57 of file UserData.java.

7.40.3.8 setName()

```
void es.deusto.bspq21e1.serialization.UserData.setName (
    String name )
```

Definition at line 49 of file UserData.java.

7.40.3.9 setPassword()

```
void es.deusto.bspq21e1.serialization.UserData.setPassword (
    String password )
```

Definition at line 65 of file UserData.java.

7.40.3.10 setStars()

```
void es.deusto.bspq21e1.serialization.UserData.setStars (
    List< Integer > stars )
```

Definition at line 73 of file UserData.java.

7.40.3.11 toString()

```
String es.deusto.bspq21e1.serialization.UserData.toString ( )
```

Definition at line 78 of file UserData.java.

7.44.1 Detailed Description

Class for the representation of the Van object which is going to be send to clients.

Author

SPQ Group 1

Version

1.0

Definition at line 8 of file VanData.java.

7.44.2 Constructor & Destructor Documentation

7.44.2.1 VanData() [1/2]

```
es.deusto.bspq21e1.serialization.VanData.VanData ( )
```

Definition at line 23 of file VanData.java.

7.44.2.2 VanData() [2/2]

```
es.deusto.bspq21e1.serialization.VanData.VanData (
    String licensePlate,
    String brand,
    String model,
    String location,
    int capacity,
    boolean kitchen,
    boolean shower,
    boolean offRoad,
    double pricePerDay,
    String user )
```

Creates the object that has the data from Van.

Parameters

<i>licensePlate</i>	License plate of the van.
<i>brand</i>	Brand of the van.
<i>model</i>	Model of the van.
<i>location</i>	Town in which the van is located.
<i>capacity</i>	Maximum number of people allowed to rent the van.
<i>kitchen</i>	If it has a kitchen.
<i>shower</i>	If it has a shower.
<i>offRoad</i>	If it has off road capabilities.
<i>pricePerDay</i>	The price per day that cost to rent it.
<i>user</i>	User that owns the van (just the
